EMPLOYABILITY REPORT 2023

WELCOME TO HARBOUR.SPACE

01

We imagine a world where all driven and talented individuals have the opportunity to reach their full potential.

Why? Because we believe that motivation surpasses grades, and financial or geographical constraints shouldn't limit a young person's development. We challenge institutional barriers and outdated application processes to make this a reality.

WE OPENED A SECOND CAMPUS, IN THAILAND, IN PARTNERSHIP WITH THE UNIVERSITY OF THAI CHAMBER OF COMMERCE

WE LAUNCHED 2 NEW MASTER PROGRAMS WITH ACCREDITATION BY THE UNIVERSITY OF VIC: DIGITAL TRANSFORMATION, APPLIED DATA & COMPUTER SCIENCE.

WE ARE WORLD GOLD MEDALLISTS & EUROPEAN CHAMPIONS IN THE 47TH INTERCOLLEGIATE PROGRAMMING CONTEST

Our goal is to transform Harbour.Space into a global brand with multiple locations, representing every part of the world. This expansion aims to provide educational opportunities to a broader community of students and establish professional partnerships with a diverse array of businesses.

Our community of students, alumni, faculty, and staff are our greatest asset. Together, there's no limit to what we can achieve.

GUIDING PRINCIPLES

02

Disciplines of the Future

10 Programmes to prepare young talents for the jobs of tomorrow. Because we focus on innovative disciplines, nurturing relevant skill sets.

Industry Practitioners

100+ High-profile experts to train students for success, combining professional skills with personal insights. To become the best we learn from the best.

Accelerated Learning

15 intensive courses per year, instead semesters or trimesters. Because we value time and provide opportunities for steep learning curves.

Personalised Approach

100+ courses to build a holistic educational experience. Our flexible academic system allows for students to maximise their full potential.

SUCCESS STORIES

03

Sergi Roig

Fintech Alumni
Founder at Staria Technologies

Harbour Space was like a deep dive into the world of start-ups. With courses ranging from financial analysis and forecasting to understanding cap tables and go-to-market strategies, I got the full toolkit for managing operations and finance. Now, as the CFO and COO of my own start-up, I'm in the thick of it, making purchasing decisions, scrutinizing the financials, and steering the ship with all the resources we've got. I would say Harbour.Space didn't just teach me, it prepared me to lead. In the start-up world, that made all the difference.

Margherita Giottoli

Interaction Design Alumni
Interaction Designer at Jam3

My experience at Harbour Space has been nothing short of transformative. Pursuing a Master's degree in Interaction Design has not only equipped me with valuable skills and knowledge but has also opened up a world of opportunities. Beyond the academic aspect, the highlight of my journey has been the incredible people I've met along the way. I have found lifelong friends who share my passion for design, and their constant support and collaboration have been instrumental in my personal & professional growth. I owe a great deal of my success and happiness to this incredible institute.

Hussein Hasan

Front-end Development Alumni
Software Developer at Adidas

Despite a successful career as a Software Engineer in Iraq, I was hungry for more! Harbour.Space made it possible for me to start a new chapter of my life, living and working abroad while meeting great, new friends from around the world. The work & study model was the perfect fit for me, applying my skills practically along my Master's degree. It was intense, sometimes challenging and pushing me to my limits. But ultimately, I wouldn't want it any other way. Because it prepared me for the real world and made me incredibly grateful for the people I met along the way.

Sirada (Belle) Chaisomboonpan

Digital Marketing Alumni
Digital Marketing Specialist at OOZOU

As a linguist turned digital marketer, I was struggling to move forward with my career. I realized it was time to upskill myself. So I joined Harbour.Space which completely changed my life, in ways I had never imagined! Not only did I fine tune my skill set with the help of our professors, aka industry leaders. I also acquired soft skills, such as public speaking skills, that helped me get the jobs I wanted. Moreover, meaningful friendships and valuable connections opened up tons of amazing opportunities.

Companies our Alumni Work at

Our alumni work at a variety of businesses that range from global superstars to small, local startups. Have a look at the following examples of companies and the positions they have.
